Welcome Address

The **Federation of European Pharmacological Societies** (EPHAR) consists of 29 member societies that collectively have a total of 12,000 individual members across Europe. Eight years after its last in person Congress, EPHAR will welcome pharmacologists from Europe and the world from **June 23-26, 2024** at the **Megaron Athens International Conference Center**, in downtown Athens. We look forward to hosting a diverse crowd of students, early career researchers, as well as late stage accomplished professionals and world-leading authorities. We anticipate the active participation of basic and clinical pharmacologists from academia, as well as biotech innovators and pharma industry scientists.

There is a number of opportunities to get involved with EPHAR2024. We will be accepting abstracts submissions for oral communications and poster presentations until December 2023 and we invite proposals for satellite meetings until January 2024. The scientific sessions at EPHAR2024 include **keynote lectures, round tables, panel discussions, workshops, as well as oral and poster sessions**, where you can share your expertise and experiences with other attendees. The conference presents a unique opportunity for intra- and interdisciplinary cross-fertilization of ideas and incorporation of new approaches in all areas of drug discovery and development from target identification and validation to clinical science.

We are looking forward to welcoming you to Greece a country famed for its history, its natural beauty and its hospitality. You will be able to taste some of Greece' s ancient and modern culture, while catching up with friends and colleagues, in the events in our social program.

See you in Athens!

With Best Wishes,

Andreas Papapetropoulos, PhD
EPHAR President

About EPHAR

Established in 1990, the Federation of European Pharmacological Societies, a non-profit association, set as its mission to advance research and education in Pharmacology and related sciences and to promote co-operation between National/Regional Pharmacological Societies in Europe and surrounding countries.

Fundamental principle of EPHAR is that nothing done by, or in the name of, the federation shall detract from autonomy of any of the participating societies. As to achieve its objects, the Federation undertakes the follow actions:

- ✓ Hold and arrange instructional courses and training programs in matters connected with pharmacology;
- ✓ Facilitate the exchange of scientific information between European pharmacologists by encouraging the holding of joint meetings between European member societies and by other appropriate means, like the periodical European congresses of Pharmacology;
- ✓ Collect, disseminate information and encourage the participation to important activities organized by member societies. This will include the production of a calendar of the National and joint meetings of each European society.
- ✓ Establish common standards for basic courses in pharmacology
- ✓ Encourage scientific collaboration between member societies by appropriate means.

About HSBCP

The Hellenic Society of Basic and Clinical Pharmacology is a non-profit scientific society which, for the last three decades, has been supporting the dissemination and advancement of the science of Pharmacology in Greece. The Society's aims include informing, supporting, and promoting scientists in the fields of basic and clinical pharmacology, be it at research or service providing level, as well as the promotion of scientific associations and collaborations, in Greece and abroad.

The Society organizes congresses, meetings and seminars and participates actively in international scientific events concerning Pharmacology in general, taking particular consideration of its younger scientist - members.

The Society is a full member of the Federation of European Pharmacological Societies (EPHAR), the International Union of Basic and Clinical Pharmacology (IUPHAR) and the European Association for Clinical Pharmacology and Therapeutics (EACPT), with official representation in working groups and executive committees.

The Society believes at the great potential of the science of Pharmacology and of its contribution to national development, while it welcomes the support and contribution of all interested parties in achieving its aims.
